· **General protective and hygienic measures**

*Instantly remove any soiled and impregnated garments.
Wash hands during breaks and at the end of the work.
Avoid contact with the eyes.*

· **Breathing equipment:**

*Wear respiratory protection in case of insufficient ventilation.
The selection of respirators (EN 14387) must be based on the known or anticipated exposure concentrations, the hazards of the product and the occupational exposure limits (section 8.1) of the respirator in question.*

*Particle filter PP1: Inert substance; P2, P3: Hazardous substances
Provide adequate ventilation. This can be achieved by local exhaust ventilation or general exhaust ventilation.
(EN 689 - Methods for determining inhalation exposure)*

*This applies especially at the mixing or stirring place.
If this is not sufficient to keep the concentration below the occupational exposure limit, provide respiratory protection.
In case of brief exposure or low pollution or when application is performed at confined area with adequate mechanical ventilation meeting local authority requirements, use breathing filter apparatus. In case of intensive or longer exposure use breathing apparatus that is independent of circulating air.*

· **Hand protection**

*Protective gloves.
Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation*

· **Material of gloves**

*After use of gloves apply skin-cleaning agents and skin cosmetics.
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.*
