Page 2/9

SECTION 3: Composition/information on ingredients · 3.2 Mixtures · Description: Active substance with propellant. Mixture consisting of the following components. · Dangerous components: 2,2-Dimorpholinodiethyl ether <2.5% Eye Irrit. 2, H319 · Additional information For the wording of the listed hazard phrases refer to section 16.

SECTION 4: First aid measures . .

• 4.1 Description of first aid me	easures
General information	Remove, decontaminate and dispose of soiled, soaked clothing and shoes immediately.
· After inhalation	Remove person to fresh air, keep warm, allow to rest; if breathing is difficult, seek medical attention.
· After skin contact	In case of contact with skin, preferably wash with polyethylene glycol-based cleaner or clean with plenty of warm water and soap. Consult a doctor in case of skin reactions.
· After eye contact	Rinse the eyes with open eyelids for a sufficiently long time (at least 10 minutes) with water that is as lukewarm as possible. Consult an ophthalmologist.
· After swallowing	Do NOT induce vomiting. Rinse mouth with water. Medical attention required.
 4.2 Most important symptoms and effects, both acute and 	S
delayed	Information for the doctor: The product irritates the respiratory tract and is a potential trigger for skin and respiratory sensitisation. Treatment of acute irritation or bronchial constriction is primarily symptomatic. Depending on the extent of exposure and the symptoms, prolonged medical treatment may be necessary.

· 4.3 Indication of any immediate medical attention and special treatment needed No information available.

SECTION 5: Firefighting measures

· 5.1 Extinguishing media

· Suitable extinguishing agents CO2, extinguishing powder or water jet. Fight larger fires with water jet. Use fire fighting measures that suit the environment. · 5.2 Special hazards arising from the substance or Can be released in case of fire mixture

Carbon monoxide (CO) Nitrogen oxides (NOx)

	(Contd. of page 2 <i>Hydrogen cyanide (HCN)</i> (<i>Traces</i>)
5.3 Advice for firefighters Protective equipment:	No special measures required.
SECTION 6: Accidental	
SECTION 6: Accidental	Telease measures
6.1 Personal precautions, protective equipment and	
emergency procedures 6.2 Environmental	Not required.
precautions:	Dilute with much water.
6.3 Methods and material for	-
containment and cleaning u	p: Absorb with liquid-binding material (sand, diatomite, acid binders universal binders, sawdust).
6.4 Reference to other	
-	
sections	See Section 7 for information on safe handling See Section 8 for information on personal protection equipment.

See Section 13 for information on disposal.

SECTION 7: Handling and storage

7.1 Precautions for safe handling	Ensure sufficient air exchange and/or extraction in the work areas Air extraction is required for spray application. For solid products: Avoid dust formation and dust deposits. Air limit values mentioned in section 8 must be monitored. At workplaces where isocyanate aerosols and/or vapours can occur in higher concentrations, targeted air extraction must be used to prevent the occupational hygiene limit value from being exceeded. The air must be moved away from people. For products containing solvents: Explosion protection required. The personal protective measures described in section 8 must be observed. The protective measures required when handling
	isocyanates must be observed. Avoid contact with skin and eye and inhalation of vapours. Keep away from food and beverages. Wash hands before break and at the end of work and apply skin protection ointment. Store work clothes separately. Remove soiled, soaked clothing immediately.
7.2 Conditions for safe storage, including any	
incompatibilities	Keep container dry and tightly closed. Further information on the storage conditions that must be observed for quality assurance reasons can be found in our technical data sheet.
	(Contd. on page 4

Page 4/9

Version number 18 (replaces version 17)

Revision: 10.03.2024

Trade name MC-DUR PowerCoat Cat

	(Contd. of page 3)
 Storage Requirements to be met by storerooms and containers: 	Store only in the original container.
 Further information about storage conditions: 	None.
 Storage class 7.3 Specific end use(s) 	10 No further relevant information available.
SECTION 8: Exposure co	ontrols/personal protection
 8.1 Control parameters Components with critical values that require 	
monitoring at the workplace:	The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.
· Additional information:	The lists that were valid during the compilation were used as basis.
8.2 Exposure controls Appropriate engineering	
controls	No further data; see section 7. es, such as personal protective equipment
· General protective and	s, such as personal protective equipment
hygienic measures	Keep away from food, drink and animal feed. Remove soiled, soaked clothing immediately. Wash hands before breaks and at the end of work.
	Avoid contact with eyes and skin.
· Breathing equipment:	Respiratory protection required at insufficiently ventilated workplaces and when working with splashes. Fresh air masks or combination filters A2-P2 (EN529) are recommended for short-
	term work. If applicable, further recommendations for respiratory protection can be found in the appendix.
	In case of hypersensitivity of the respiratory tract (asthma, chronic bronchitis), handling of the product is not recommended.
· Hand protection	Suitable materials for protective gloves; EN 374:
	Butyl rubber, nitrile rubber, chloroprene rubber (neoprene). Note: suitable materials that provide sufficient protection for industrial cleaning with aprotic polar solvents (according to IUPAC definition): butyl rubber.
	In case of prolonged or frequently repeated contact, a glove with a protection class of 5 or higher is recommended (breakthrough time
	greater than 240 minutes according to EN374). For short-term
	contact, a glove with a protection class of 3 or higher is recommended (breakthrough time greater than 60 minutes according to EN374).
	The thickness of the material is not the only criterion for the level of
	protection of a glove against a chemical substance. The protective
	effect also depends to a large extent on the type of glove material. Depending on the type and material, the thickness must be more than 0.35 mm to ensure adequate protection in the event of
	(Contd. on page 5)

Revision: 10.03.2024

Trade name MC-DUR PowerCoat Cat

	(Contd. of page 4) prolonged and frequent contact. Exceptions to this rule are multi- layer gloves, which guarantee sufficient protection even with a thickness of less than 0.35 mm during prolonged wear. Other glove materials with a thickness of less than 0.35 mm only provide sufficient protection for short periods of wear. For solvent-free products: Example: Polychloroprene - CR: thickness ≥0.5mm; breakthrough time
	≥480min. Nitrile rubber - NBR: thickness ≥0.35mm; breakthrough time >480min.
	Eutyl rubber - IIR: thickness ≥0.5mm; breakthrough time ≥480min. Fluoro rubber - FKM: thickness ≥0.4mm; breakthrough time ≥480min.
	Recommendation: Dispose of contaminated gloves.
 Material of gloves 	Polychloroprene - CR
_	Nitrile rubber - NBR
	Butyl rubber - IIR
	Fluoro rubber - FKM
· Penetration time of glove	
material	Polychloroprene - CR: thickness ≥0.5mm; breakthrough time ≥480min.
	Nitrile rubber - NBR: thickness ≥0.35mm; breakthrough time ≥480min.
	Fluoro rubber - FKM: Thickness ≥0.4mm; Breakthrough time ≥480min.
• Eye/face protection	Safety goggles with side protection in accordance with EN 166.
 Body protection: 	Use chemical-resistant protective clothing.
	In case of hypersensitivity of the skin, handling the product is not recommended.

SECTION 9: Physical and chemical properties

 9.1 Information on basic physical a General Information 	na chemical properties	
Physical state	Fluid	
· Colour:	Yellowish	
Smell:	Characteristic	
Odour threshold:	Not determined.	
Melting point/freezing point:	Not determined	
Boiling point or initial boiling point	and	
boiling range	Not determined	
Flammability	Not applicable.	
Lower and upper explosion limit		
Lower:	Not determined.	
· Upper:	Not determined.
